SUMMARY

Mobile & Frontend Engineer with 5+ years of experience specializing in React Native, React, and Flutter. Proven track record of building scalable, high-performance applications across startup environments using TypeScript and JavaScript. Experienced in clean architecture, performance optimization, and AI-assisted development workflows to accelerate delivery while maintaining code quality. Adaptable, collaborative, and focused on building reliable, user-centric products.

WORK EXPERIENCE

Kawan Lama Group

Jakarta, Indonesia (Remote from Bandung)

Mobile Application Developer

October 2022 – Current

- Develop and maintain RUPARUPA, Kawan Lama Group's cross-platform e-commerce application for Android and iOS, leveraging React Native, TypeScript, Redux Toolkit, and Zustand to build scalable features, optimize performance, and resolve critical production issues.
- Reduced customer complaints by 15% by redesigning and optimizing the refund process, significantly improving the overall customer experience.
- Implement core e-commerce features including authentication, shopping cart, payment integration, user accounts, personalized journeys, deep linking, universal links, and Firebase Cloud Messaging (FCM) push notifications.
- Reduced the application bundle size by 45%, significantly improving CodePush OTA deployment efficiency and reducing update delivery time.
- Own the mobile release process by managing over-the-air (OTA) deployments with CodePush and publishing releases to both the Google Play Store and Apple App Store.
- Serve as an On-Call Engineer on a rotational schedule, responding to production incidents, performing root cause analysis, coordinating resolutions, and producing postmortem reports to prevent recurring issues.
- Monitor production health using Sentry, proactively investigating crashes and performance issues to maintain application stability and reliability.
- Collaborate closely with product managers, designers, backend engineers, and QA in an Agile environment while participating in code reviews and continuously improving application architecture, maintainability, and engineering best practices.

VCGamers

Bekasi, Indonesia (Remote from Bandung)

Sr. Mobile Application Developer

April 2022 – October 2022

- Contributed to a gaming-focused social commerce platform with 10,000+ downloads, delivering scalable cross-platform features using React Native, TypeScript, and Recoil for state management.
- Developed social networking features that enabled gamers to interact through posts, user profiles, and community engagement, creating a Facebook-like experience tailored for gamers.
- Designed and implemented a gaming tournament management system, including single elimination bracket generation and tournament progression.
- Maintained and enhanced e-commerce functionalities, ensuring reliable product browsing, purchasing, and overall shopping experience.
- Integrated CodePush to deliver over-the-air (OTA) updates, reducing release cycles and enabling faster bug fixes without requiring users to update through the app stores.
- Applied Domain-Driven Design (DDD) architecture, improving code organization, scalability, and maintainability.
- Reviewed pull requests, provided constructive technical feedback, and promoted best practices to improve code quality, maintainability, and consistency across the React Native codebase.

- Collaborated closely with designers, backend engineers, and product managers in an Agile environment to deliver high quality features.
- Improved application performance, stability, and user experience through continuous optimization and code refactoring.

Maimaid.id

Jakarta, Indonesia

Mobile Application Developer

November 2021 – March 2022

- Developed a cross-platform household assistance booking and on-demand service application using Flutter and BLoC state management for Android and iOS, successfully delivering the product from concept to production in 6 months.
- Worked as one of 2 mobile engineers in a 4-person engineering team, collaborating closely with product stakeholders, UI/UX designers, and founders to shape product requirements, contribute to system architecture, and deliver technical solutions.
- Integrated Verihubs AI-powered Face Recognition and Face Comparison services into the user registration flow, strengthening identity verification and enhancing account security
- Integrated Firebase Cloud Messaging (FCM) to deliver real-time push notifications for bookings, order updates, and customer engagement.
- Successfully managed and delivered the application's first production release on both the Google Play Store and Apple App Store
- Contributed across the full product lifecycle from feature planning and UI discussions to implementation, testing, deployment, and post-release improvements demonstrating strong cross-functional collaboration and ownership.

Proedu.id

Jakarta, Indonesia

Mobile Application Developer

August 2021 - January 2022

- Developed a React Native competency improvement platform serving 1,000+ teachers and professionals across Indonesia using Javascript, Redux, REST APIs, and Git.
- Collaborated within a cross-functional team consisting of a CEO, UI/UX designer, web frontend engineer, and backend engineers to deliver product features in an Agile environment.
- Partnered closely with the UI/UX Designer to translate business requirements into intuitive, responsive, and user-friendly mobile experiences while ensuring seamless integration with REST APIs.
- Refactored approximately 50% of the existing React Native codebase, improving maintainability, scalability, performance, and overall code quality.
- Successfully launched the application on the Google Play Store, achieving 1,000+ downloads.
- Implemented a centralized bug reporting and crash monitoring solution using Firebase Crashlytics, significantly improving issue visibility, debugging efficiency, and the development team's incident resolution workflow.

Glints Academy

Batam, Indonesia (Remote from Bandung)

React Native Developer

April 2021 – August 2021

- Collaborated with the team consisting of 3 stacks and Product Owner in the process of developing the application.
- Succeeded in Slicing UI/UX Prototype from Figma into a brilliantly designed Application.
- Developed 2 React Native Projects using Redux State Management and Saga Middleware.

LEADERSHIP EXPERIENCE

Glints Academy

Batam, Indonesia (Remote from Bandung)

Tech Lead of Mobile Developer

April 2021 – August 2021

- Acted as Tech Lead of the Mobile Developer team for the MovReview project and lead 3 people.
- Mentored 3 React Native Developers in the team on how to implement Redux.
- Assisted team members in the development process and successfully managed to finish the project in 1 week.

Bank BTPN

Bandung, Indonesia

Lead IT Trainee

August 2017 – September 2017

- Acted as lead of 5 IT Staff Interns and assisted in the development of the Attendance Management System for Interns using PHP.
